OTTAWA, ON (June 9, 2023)-
A devastating disaster has struck southern Ukraine, where a major dam collapse has not only endangered human lives but also left countless innocent animals in immediate danger. In this critical moment, we are hoping you have the capacity to be by our side as we work with partners on the ground that are rescuing animals from the water. The situation is dire. Flooding caused by the collapsed Nova Kakhovka dam has engulfed villages, jeopardized vital crops, and disrupted drinking water supplies for both humans and animals. We are racing against time, battling treacherous conditions, and doing everything we can to provide emergency assistance to those in need. Your compassion and generosity will provide immediate relief and pave the way for a brighter future for both animals and their human counterparts in Ukraine. In response to VWB/VSF's Emergency Campaign, Elimedical has stepped up to the call. Elimedical customers, old and new, can support these efforts by continuing to buy Elimedical products, trying some additional Elimedical products, or stocking up a bit ahead of time. Together, we can help make a difference to the many animals and people in Ukraine that will need others to support them in rebuilding their lives and communities. Thank you.
